DHARMA TEJA YADAGANI

yadaganiteja@gmail.com | +91 9381138257 | LinkedIn | GitHub

Professional Summary

AI and Machine Learning undergraduate with hands-on experience in building LLM-powered applications, including Retrieval-Augmented Generation (RAG) pipelines and multi-agent systems. Skilled in prompt engineering, model evaluation, and deploying scalable AI solutions using Python, FastAPI, and modern frameworks. Experienced in designing end-to-end AI pipelines, integrating APIs, and improving system performance through iterative experimentation.

Education

B.Tech in Artificial Intelligence and Machine Learning — Expected 2027
SRKR Engineering College, Bhimavaram
CGPA: 8.87 / 10

Intermediate (MPC) — 2021 – 2023
Sasi Junior College, Tadepalligudem
Percentage: 96.7%

SSC — 2021
Sasi EM High School, Kadakatla
Percentage: 98.1%

Experience & Achievements

- Finalist in **AI for Bharat** – national-level hackathon conducted by Hack2Skills.
- Designed and developed **LearnO**, a multi-agent AI learning platform with 8+ specialized agents.
- Built **RAG pipelines** using embeddings and vector databases for context-aware responses.
- Developed scalable architecture using **AWS (Lambda, API Gateway, Bedrock, S3)** for real-time AI applications.
- Implemented **agent orchestration, tool usage, and persistent memory** for personalized workflows.
- Delivered an end-to-end AI solution for learning, assessment, coding, and job search.

AI & Machine Learning Intern — IBM SkillsBuild (Edunet Foundation) — 10/07/2025 – 10/08/2025

- Developed a GenAI-based AI hiring assistant to automate candidate screening and interview workflows.
- Integrated LLMs with prompt engineering and implemented **RAG-based retrieval** for contextual responses.
- Designed multi-stage agent workflows with memory for dynamic interview generation.
- Evaluated LLM outputs based on relevance, coherence, and accuracy to improve response quality.
- Conducted iterative prompt and architecture experiments, improving system efficiency by 40%.

Technical Skills

Languages: Python
AI/ML: Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP), Large Language Models (LLMs), Generative AI
Data: Pandas, NumPy
Concepts: Prompt Engineering, Fine-Tuning, Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, Model Evaluation
Frameworks: Scikit-Learn, TensorFlow, Keras, Hugging Face Transformers, LangChain
Backend: FastAPI
Tools: Git, VS Code, Jupyter Notebook, Google Colab, n8n, OpenAI, Hugging Face

Projects

End-to-End Emotion Detection System

- Built an end-to-end emotion detection system using CNN-based deep learning models trained on FER-2013 dataset.
- Achieved 78% accuracy and reduced inference latency by 30% using FastAPI-based deployment.
- Applied data preprocessing and augmentation to improve model generalization.
- Containerized the system using Docker for scalable deployment.

AI Hiring Agent (TalentScout)

- Built an AI-powered hiring assistant using **Streamlit** and **Groq (LLaMA 4 Scout 17B)**.
- Designed a multi-agent system for dynamic interview generation and evaluation.
- Implemented **RAG-based retrieval** for context-aware candidate assessment.
- Developed an evaluation engine to score responses and provide structured feedback.
- Integrated memory and multi-stage decision workflows for improved candidate analysis.
- Reduced manual screening effort by 60%.

Certifications

- AIML Internship — Edunet Foundation (IBM SkillsBuild)
- GenAI Learning Path — Analytics Vidhya
- Artificial Intelligence Program Completion — IBM SkillsBuild
