

DHARMA TEJA YADAGANI

yadaganiteja@gmail.com | +91 9381138257 | LinkedIn | GitHub

Professional Summary

AI and Machine Learning undergraduate with hands-on experience in developing machine learning, deep learning and LLM-powered applications. Skilled in building end-to-end AI pipelines, deep learning model development, prompt engineering, and API deployment using Python and modern frameworks. Passionate about designing scalable AI solutions and contributing to production-grade intelligent systems.

Education

B.Tech in Artificial Intelligence and Machine Learning

Expected 2027

SRKR Engineering College, Bhimavaram

CGPA: 8.87 / 10

Intermediate (MPC)

2021 – 2023

Sasi Junior College, Tadepalligudem

Percentage: 96.7%

SSC

2021

Sasi EM High School, Kadakatla

Percentage: 98.1%

Internship Experience

AI & Data Analytics Intern — Edunet Foundation

10/07/2025 – 10/08/2025

- Developed a CNN-based model for tree species classification as part of AI internship work.
- Processed and augmented image datasets to improve model robustness and generalization.
- Trained and fine-tuned deep learning models using TensorFlow/Keras, achieving 85% accuracy.
- Analyzed model performance using evaluation metrics and contributed to model improvements.

AI & Machine Learning Intern — IBM SkillsBuild (Edunet Foundation)

10/07/2025 – 10/08/2025

- Developed a GenAI-based AI hiring assistant to automate candidate screening and interview workflows.
- Integrated LLMs with prompt engineering to generate dynamic interview questions and responses.
- Implemented contextual memory and workflow logic for multi-stage candidate evaluation.
- Built and tested end-to-end pipeline improving efficiency in candidate shortlisting and interaction.

Technical Skills

Programming: Python, SQL Basics

Machine Learning: Supervised Learning, UnSupervised Learning, Classification Models, Model Evaluation

Deep Learning: Image Preprocessing, Data Augmentation, Neural Networks, CNN, RNN, LSTM, Transformers, Transfer Learning

Natural Language Processing: Text Preprocessing, Tokenization, NER, Sentiment Analysis, Text Classification, Tf-Idf, Bert Embeddings

Data Processing: Pandas, NumPy, PySpark

Frameworks & Libraries: Scikit-learn, TensorFlow, Hugging Face Transformers

Generative AI & LLMs: Large Language Models, Prompt Engineering, Retrieval-Augmented Generation, Embeddings, Vector Databases (FAISS, ChromaDB), Fine-tuning (Lora, PEFT)

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code

LLM Tools: LlamaIndex, Gemini API, HuggingFaceInference API

Deployment: Basic Deployment Concepts, Fast API

Projects

End-to-End Emotion Detection System

- Built an end-to-end emotion detection system using CNN-based deep learning models trained on the FER-2013 Dataset achieving 78% accuracy.
- Developed a FastAPI-based REST API to serve the trained model for real-time inference, reducing latency by 30
- Applied data preprocessing and augmentation techniques to reduce overfitting.
- Containerized the inference service using Docker for scalable deployment

AI Hiring Agent (TalentScout)

- Built an AI-powered hiring assistant using **Streamlit** and **Groq (LLaMA 4 Scout 17B)** for automated candidate screening
- Designed a structured interview workflow with dynamic, role-based question generation using prompt engineering
- Implemented a context-aware chat-based interview system with session management
- Developed an AI evaluation engine to score responses, provide feedback, and support multi-interview history tracking

Certifications

- AIML Internship — Edunet Foundation (IBM SkillsBuild)
- AI & Data Analytics Internship — Edunet Foundation
